EXTRACTA MATHEMATICAE 1998

Indice de Autores
Volumen 13

Expository Papers

CAIRÓ, L., *Similarity and Rescaling* 1–19

ECHEVERRÍA, A., *Mathematical Foundations of Geometric Quantization* 135–238

FEIX, MARC R., *Similarity and Rescaling* 1–19

MUÑOZ, M., *Mathematical Foundations of Geometric Quantization* 135–238

ROMÁN, N., *Mathematical Foundations of Geometric Quantization* 135–238

VICTORIA, C., *Mathematical Foundations of Geometric Quantization* 135–238

Research Papers

ALVAREZ, M., *Restricted Three-Body Problems and the Non-Regularization of the Elliptic Collision Restricted Isosceles Three-Body Problem* 73–94

AMIR, B., *Application de la Théorie d'Extrapolation pour la Résolution des Équations Différentielles à Retard Homogènes* 95–105

AYE AYE, K., *On the Spectra of Elements in Certain Algebras of Vector Valued Functions and Sequences* 35–40

BARRIO, R., *A Matrix Analysis of the Stability of the Clenshaw Algorithm* 21–26

BENAYED, M., *Matched Pairs and Extensions of Lie Bialgebras* 255–261

BOUCETTA, M., *Sur les Intégrales Premières Symétriques du Flot Géodésique* 263–269

CABEZAS, J.M., *Las Álgebras de Lie $(n-3)$-Filiformes como Extensiones por Derivaciones* 383–391

CAROTHERS, D.C., *The Band Generated by Homomorphisms on Banach Lattices* 271–281

CHARATONIK, J.J., *Some Questions on the Composition Factor Property for Atomic Mappings* 283–287

CHAVARRIGA, J., *Integrable Systems Via Inverse Integrating Factor* 41–60

DIEROLF, S., *On the Spectra of Elements in Certain Algebras of Vector Valued Functions and Sequences* 35–40

EL KINANI, A., *Extension d'un Théorème de von Neumann dans les a*-Algèbres* 289–294

FELDMAN, W.A., *The Band Generated by Homomorphisms on Banach Lattices* 271–281

FELIPE, R., *Equations of Lax Type with a Triple Bracket* 295–302

FERNÁNDEZ LÓPEZ, A., *Local Algebras and the Largest Spectrum Finite Ideal* 61–67

FERNÁNDEZ MUÑIZ, J.L., *Riesz's Lattices and Almost Positive Operators* 303–312

FRANCO, D., *Periodic Boundary Value Problem for Nonlinear First Order Ordinary Differential Equations with Impulses at Fixed Moments* 313–326

GALINDO, J., *On a Theorem of van Douwen* 115–123

GINÉ, J., *Integrable Systems Via Inverse Integrating Factor* 41–60

GÓMEZ, J.R., *Las Álgebras de Lie* $(n-3)$*-Filiformes como Extensiones por Derivaciones* 383–391

GONZÁLEZ, M., *A Note on the* L^1*-Convergence of a Superadditive Bisexual Galton-Watson Process* 69–72

GUZMÁN OVANDO, M.E., *Riesz's Lattices and Almost Positive Operators* 303–312

HERNÁNDEZ, S., *On a Theorem of van Douwen* 115–123

HOUIMDI, M., *Sur le Spectre d'un Shift à Poids Opérateurs* 327–333

JAA, O., *Local Algebras and the Largest Spectrum Finite Ideal* 61–67

DE LEÓN, M., *Conservation Laws and Symmetry in Economic Growth Models: a Geometrical Approach* 335–348

LINDEBOOM (GROENEWALD), L., *A Note on the Singular Spectrum* 349–357

LLIBRE, J., *Restricted Three-Body Problems and the Non-Regularization of the Elliptic Collision Restricted Isosceles Three-Body Problem* 73–94

MANIAR, L., *Application de la Théorie d'Extrapolation pour la Résolution des Équations Différentielles à Retard Homogènes* 95–105

MARINO, G., *When is any Continuous Function Lipschitzian?* 107–110

MARTÍN DE DIEGO, D., *Conservation Laws and Symmetry in Economic Growth Models: a Geometrical Approach* 335–348

MOHAMMADINE, B., *Sur les Vitesses de Convergence en Theorie des Valeurs Extremes* 359–369

MOLINA, M., *A Note on the L^1-Convergence of a Superadditive Bisexual Galton-Watson Process* 69–72

NIETO, J.J., *Periodic Boundary Value Problem for Nonlinear First Order Ordinary Differential Equations with Impulses at Fixed Moments* 313–326

OUALI, M., *Sur le Spectre d'un Shift à Poids Opérateurs* 327–333

PALLESCHI, M., *On Polarized Surfaces with a Small Generalized Class* 371–381

PYRIH, P., *Norm and Pointwise Topologies Need not to be Binormal* 111–113

RAUBENHEIMER, H., *A Note on the Singular Spectrum* 349–357

ROGOVCHENKO, Y.V., *Periodic Boundary Value Problem for Nonlinear First Order Ordinary Differential Equations with Impulses at Fixed Moments* 313–326

SCHMOEGER, C., *On Operators T such that Weyl's Theorem holds for $f(T)$* 27–33

SHIH, J.A., *Théorème d'Existence et d'Unicité pour un Système d'Équations aux Dérivées Partielles Non-Linéaire* 125–129

TURRINI, C., *On Polarized Surfaces with a Small Generalized Class* 371–381

VELÁSQUEZ, R., *Equations of Lax Type with a Triple Bracket* 295–302

Research Announcements

ABREU, R., *Solvability of a Riemann Linear Conjugation Problem on a Fractal Surface* 239–241

BERMÚDEZ, T., *On the Boundedness of the Local Resolvent Function* 131–134

BERMÚDEZ, T., *Local Ergodic Theorems* 243–248

BORY, J., *Solvability of a Riemann Linear Conjugation Problem on a Fractal Surface* 239–241

CASAS MIRÁS, J.M., *Central Extensions of Leibniz Algebras* 393–397

GONZÁLEZ, M., *On the Boundedness of the Local Resolvent Function* 131–134

GONZÁLEZ, M., *Local Ergodic Theorems* 243–248

MBEKHTA, M., *Local Ergodic Theorems* 243–248

ROMAGUERA, S., *On the Structure of the Dual Complexity Space: The General Case* 249–253

SCHELLEKENS, M., *On the Structure of the Dual Complexity Space: The General Case* 249–253
