

## PREFACE

The 2006 edition of the World Congress ICM was held in Madrid and, as usual, a number of Satellite conferences were celebrated in different places. The Organizing Committee of the ICM2006 and the Royal Mathematical Society of Spain commissioned the Banach spaces group of the University of Extremadura to organize a Satellite Conference on Banach spaces.

The Organizing Committee counted with the support of the Department of Mathematics, the University of Extremadura, the Diputación de Cáceres, Ayuntamiento de Cáceres, Junta de Extremadura and Ministerio de Educación y Ciencia. Moreover, Caja de Extremadura and Caja Duero contributed to the success of the meeting.

Most available information about the event can be found at the site <http://www.banachspaces.com>.

If a few spots of the unique atmosphere surrounding this conference can be given, here they are:

- the place chosen was Cáceres, a beautiful town whose old center has been declared by the UNESCO part of the World heritage;
- the old church of the Centro Cultural San Francisco was transformed into the main lecture hall where plenary lectures were delivered;
- the scientific committee composed by W.B. Johnson, J. Lindenstrauss, B. Maurey, A. Pajor, A. Pelczynski, D. Preiss, N. Tomczak-Jaegermann and J.M.F. Castillo set as main guideline for the conference to show open and new developing directions for Banach space theory;
- the list of main speakers was composed by R. Aron, C. Atkin, S. Argyros, J. Bastero, F. Bombal, G. Godefroy, R. Haydon, N.J. Kalton, M. Maestre, V. Milman, J. Lindenstrauss, A. Naor, J. Orihuela, H.P. Rosenthal and E. Odell;
- the “Valencia group” headed by Richard Aron, Domingo García and Manuel Maestre organized a Special Session focused on the topic Polynomials on Banach spaces.

As editor of this proceedings volume and somehow responsible for the Conference, I’m convinced that the success of the conference was due to the combination of skills and different levels of relentless efforts of the following persons, to which we all owe gratitude: the main speakers, all participants, the members of the organizing committee and Ricardo García.

If a new Banach space conference was to be organized one day in Cáceres, I hope to meet you there.

Jesús M.F. Castillo
